AI Humor

Noah Babel

My Project

- Generated series of jokes using tailored prompts on ChatGPT
- Used SteveAI and Murf AI to generate corresponding stock photos, background music, and overlaying text-to-speech

N Tell me a joke about AI in schools.

S I was supposed to start writing the paper at 5:00 PM. But then I started playing with this cool new language model for 10 minutes. 10 minutes later, it's suddenly 9:30 PM!

I was going to fly to visit my family on April 6th. My mom said, "Oh great, your stepdad's poetry reading is that night!" So now I'm flying in on April 7th.

Impact

- Room for improvement on humor

- Shows the extent of AI

    - Humor is a human experience

- Could flood YouTube and other video platforms

    - Discourages potential video makers from making videos for financial incentive, which could remove video makers as a viable career option

Thanks!

N Explain quantum entanglement as a pirate

Arrr, ye see mateys, quantum entanglement be like two treasure chests bound together. No matter how far apart they be, what happens to one will affect the other instantly, as if they be next to each other still. It be like magic, but 'tis the science of the quantum world. And just like how ye can't open one chest without affecting the other, ye can't measure or affect one entangled particle without affectin' the other. Aye, 'tis a mysterious and valuable phenomenon, just like the treasure we be after.
